

Technical Lighting Operations

TGS-2024050796

Sign up now and become a **Technical Lighting Specialist** for event media productions!

Course Overview

This course is designed to provide learners with a comprehensive understanding of technical lighting operation, covering the principles, equipment, and techniques essential for successful lighting in various settings. Participants will gain hands-on experience with lighting equipment and learn to operate them effectively for different applications.

Learning Outcomes

Production Analysis & Placement

- Analyse production needs to effectively determine the necessary lighting equipment and logistics, leveraging lighting principles and technical specifications.
- Gain the ability to strategically place lighting to achieve desired effects and enhance the creative impact of a production

Rigging & Live Operations

- Organising and rigging lighting setups in accordance with electrical principles and load management, adjusting lighting during rehearsals to meet specific production requirements, and operating lighting equipment live on cues to create dynamic effects and capture visually engaging shots

Safe Dismantling & Storage

- Equipped to supervise the dismantling and safe storage of lighting equipment post-production, ensuring longevity and safety of the hardware used.

Duration

40 hours (5 days)

- 38 training & practical hours
- 2 assessment hour

Mode of Delivery

- Classroom with Studio set up

Relevant Job Roles

Lighting Technicians, Designers, Event Organizers
